SKILLS

...and many more. Check out some of my projects via my GitHub.

EXPERIENCE

Starbucks, Spartanburg, SC - *Barista*

August 2019 - August 2020

- Make coffee
- Handle cash, customer debit/credit transactions
- Observe COVID precautions

AmbuStar/UpstateEMS, Gaffney, SC - *Emergency Medical Technician*

Early 2018 - September 16th, 2018

- Care for patients according to National and State standards afforded to the EMT, giving the best possible care to benefit the patient's health and safety.
- Writing clear and concise reports following patient contact
- Communicating clearly with Hospital staff, Dispatch, my partner(s), and most importantly: the Patient.

EDUCATION

Spartanburg Community College, South Carolina - *Associates in Computer Science, Programming/Database (in Progress)*

Started Spring 2020

I have been studying Programming at SCC where I have been exposed to programming languages such Visual Basic and C#, C++, Java, and have even been working on front-end/web development languages such as html/css.

Projects:

These are a few school related projects that are of interest or otherwise “Endeavors” I’ve taken on in my own time, outside of SCC’s curriculum:

Have been slowly learning:

- Python (Udemy, going very smooth - mostly confident in this lang)
- Rust (very slow)
- C# for game dev (Unity)
- Python for game dev (Ursina engine)

Cool Projects:

- Java webscraping app (CLI based)
- Discord API bots, C#
- Python auto clickers, spammers (some not currently on GitHub)
- Python Discord bot

Check some of these out at my GitHub
